

ADVANTAGE EASI-GLIDE★ LASER FUME EXTRACTION SYSTEMS

For the Laser Marking, Coding and Engraving Industries.

BOFA's mid to high end range of laser extraction systems combine extremely large filter capacity with high airflows and pressure. This combination makes them ideal for heavy duty applications that generate large amounts of particulate and gaseous organic compounds. Each system benefits from Automatic Closed Loop Flow Control. This feature enables the end user to set the required airflow for the application. The unit will then maintain this airflow throughout the life cycle of the filters.

The additional feature of BOFA's patent pending Easi-Glide filter location mechanism makes filter change easy, quick and safe. A truly state of the art laser fume purification solution.

- Blower with high airflow and pressure
- Filters with long life and low replacement cost
- Easi-Glide filter location mechanism
- Automatic closed loop flow control system
- Optional VOC gas sensors
- Technically advanced stop/start interfaces to laser
